The service-line contrast depends on property and people

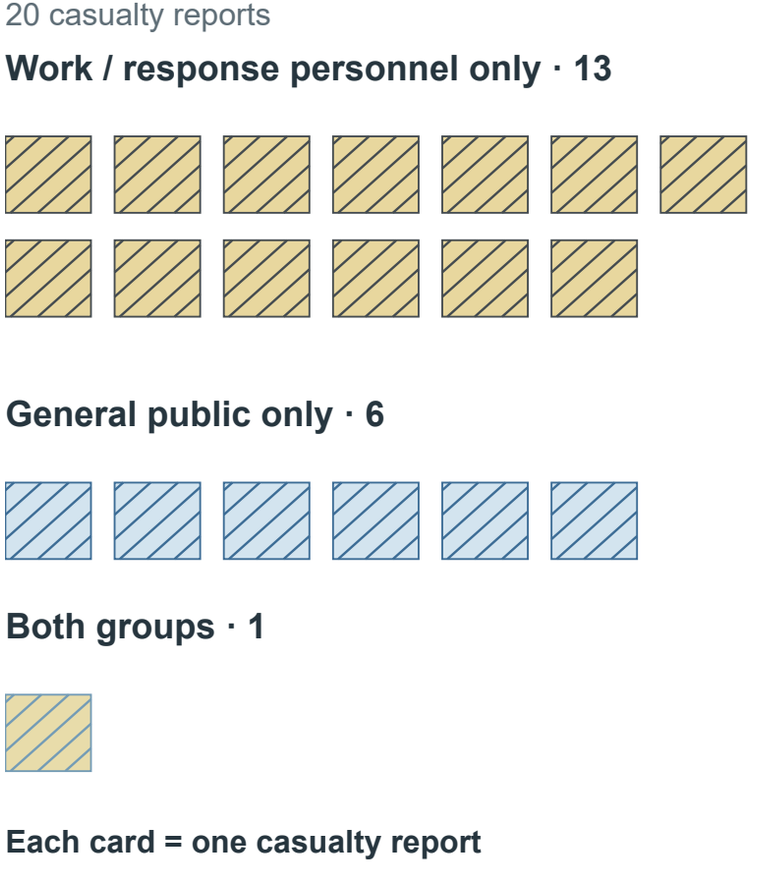

A casualty report records at least one death or inpatient injury. Locate the contrast, then examine who was affected.

a Components within each property type

b Public-property service lines

20 casualty reports

Lines: 95% Wilson intervals. Fractions: casualty / all reports. Property describes the incident site.
Work / response personnel: operator staff, contractors, responders and other right-of-way workers.
General public follows the report classification, including residents, Good Samaritans and some nearby workers.
