With 53 reports reviewed, basic information increases hits

Rules are learned from earlier reports, then checked against recorded outcomes in later reports.

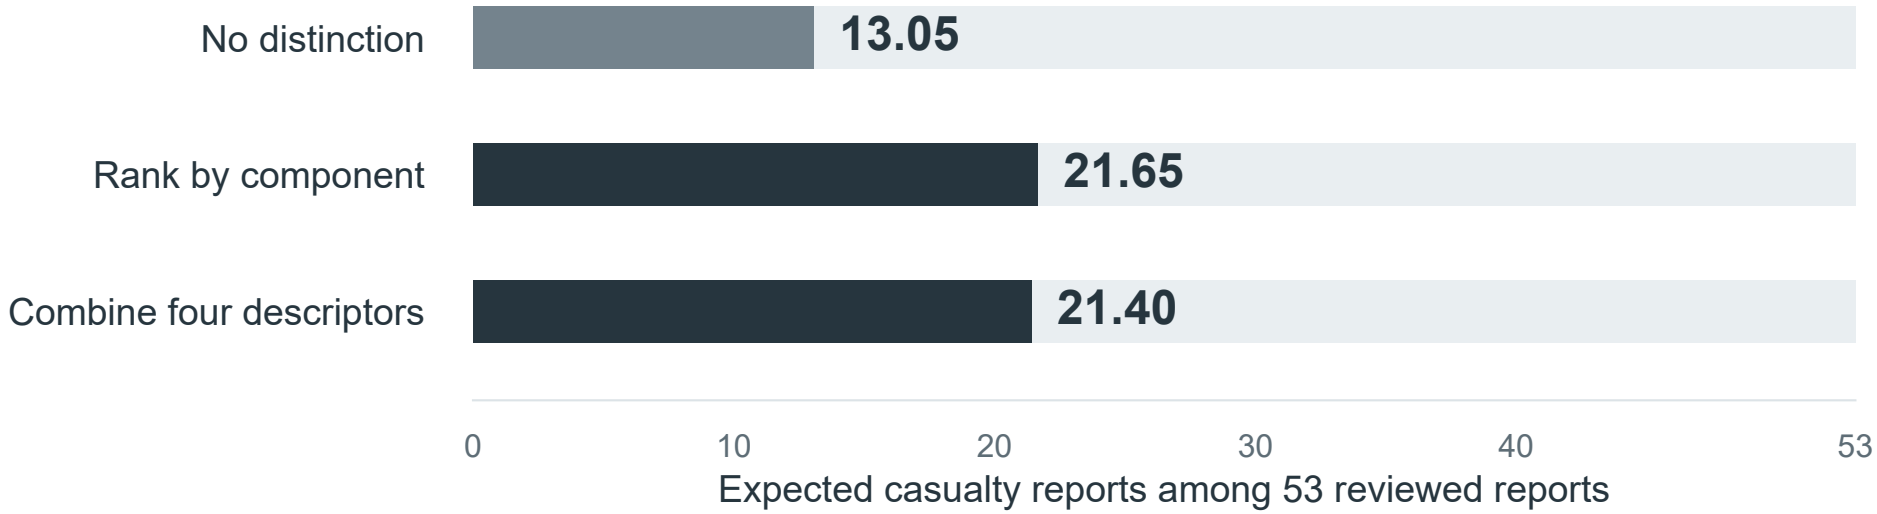

Learn the rules · 1,286 reports

Reports received in 2010–2021

Evaluate results · 264 reports

Received from 2022; 65 casualty reports

Filled portion: expected hits. Each full track represents 53 review slots.

Equal-score reports have equal selection chances, so expected hit counts may be fractional. Every method reviews 53 reports.
The combined model uses component, material, property and class location. This is a retrospective report evaluation.
